

FOR IMMEDIATE RELEASE

April 22, 2009

## Fascinating the future Rittal innovation product Ri4Power launch in China

Rittal will exhibit in the coming EP Shanghai / Electrical Shanghai 2009, to be held from July 8 – 10, 2009 at Shanghai International Exhibition Center (Level 1 & 2), Shanghai, PR China. They will introduce their innovative product Ri4Power at the fairground.

### Systems in four dimensions

**Rittal Ri4Power – the term for structured system solutions for the reliable and fast construction of low voltage switchgear systems**

for machines, plants, buildings and motor control. Rittal Ri4Power, this is the new term for high-current, low-voltage and distribution enclosures under a single roof – in accordance with a worldwide regulation (IEC 60439-1). Now

**new in the range: Rittal Ri4Power Form 2-4.**

### Universal in best form

Ri4Power Form 2-4 – this is Rittal in best form.

**Compatible with switchgear units from all popular manufacturers.**

An individual concept for universal use. New from Rittal is the type of the internal separation of the SV-TS 8 Top enclosure system. An innovation idea that appears to be very simple in principle, but, however, **Offers completely new advantages for the construction and in use.**

The design of the internal subdivision guarantees both the function and the modifications of the switchgear units. Irrespective whether during the development, the installation or in operation – the simple construction with new innovative components increases your added value. Ri4Power Form 2-4 is the perfect solution for industry plants, building engineering and infrastructure equipment.

### Superior module engineering

Ri4Power Form 2-4, the concept for individual possibilities. Two decisive properties characterise this system:

**Combination scope and compatibility.**

These two terms encompass all important advantages.

The combination scope makes Ri4Power Form 2-4 the optimum solution for your application.

And the compatibility of the components ensures improved economics. The handling is also innovative and simple: One-person assembly and a single tool suffice for most installation steps.

Rittal Ri4Power Form 2-4 offers decisive solutions when plant constructors and operators require

the best results.

EP Shanghai / Electrical Shanghai 2009 will gather 400 leading suppliers under one roof, including 3M, ABB, Hyosung, Chint, Schniewindt, Japan AE Power, Roechling, Hitachi, Toshiba, Ormazabal, Wacker, Areva, Rittal, KGE, Daihen, Pentair, MR China, NARI and Aggreko, etc., and international pavilions from Germany, United States, Finland and Russia.

EP Shanghai / Electrical Shanghai 2009 is the only power expo organized by China Electricity Council while Adsale Exhibition Services Ltd is the overseas co-organizer. As the largest and the most reputable electric power and electrical trade fair in China, EP has become the only power expo endorsed by UFI Approved Event in China, with full support from major power groups and power grid corporations. For more information, please visit the fair website at <http://www.2456.com/EP> or contact Adsale Exhibition Services Ltd.
