ENPAY – The First-time Exhibitor in EP China

Showcase the quality transformer components from Turkey

ENPAY, headquartered in Turkey, is the first-time exhibitor in EP China 2010.

As an internationally recognized producer of transformer board and transformer components, ENPAY will showcase their advanced products including magnetic cores, flux collectors, corrugated wall tanks, HV insulation components including HVDC applications and lead exits up to 1200 kV nominal voltage and transformer windings. With high-qualified staff, strong know-how, enviable R&D base and continuous improvement in technology, ENPAY has long been a world pace-setter in the transformer components with an excellent reputation

and market track record.

Exporting its products to more than 50 countries worldwide, ENPAY is glad to serve transformer industry as a reliable and experienced partner. The investments with up to date technological equipment and customer and quality oriented corporate culture are the main triggers of ENPAY in its journey of excellence.

You are welcome to visit the booth of ENPAY (Booth No.: 3M05, Hall 3) in the coming EP China 2010.
